Why tank containers and not only road tankers?

We give priority to the intermodal transports, and our equipments are at 95% made of detachable tank containers:

- **Intermodal transport reduces CO2 impact for 55% compared with the full road transports**
- **The trucks, are predominantly used just on the last mile trip: typical intermodal trip set up à 20% by road – 80% by train**
- **Our fleet is build by 85% of EURO 6 trucks, and brand new are coming**

SPECIAL EQUIPMENTS

Unloading with tipping chassis

Trucks

Cruises

Tankcontainers

Trains

Delivery door to door of chemicals

(about 80k/ton per year)
